AI Guided Business Growth and Success

Accelerate Growth & Innovation with Human-AI Collaboration
Technology, Operational and Market Risk & Cost Reduction
You don't need high risk to have high reward!

Seize the Power of Comprehensive 9-HI Human-AI Learning

9-HI is a Patent-pending platform that brings together Expert Human Collaboration and five (5) Expert GPTEnabled AI Agents in a **highly guided process**, together with four (4) data sources and 12 LLMs and custom algorithms.

- A revolutionary collaborative AI-enhanced software platform.
- Offered at low introductory cost, with options for complete custom database integration.
- Originally built to enhance and grow the US Industrial base and reshore lost capabilities.
- Be up and running on Day 1, building new innovative opportunities throughout your business.
- **Adherence to US Department of Defense Artificial Intelligence Code of Ethics.**
- Total privacy controls and protection for your team's IP, with the Security of the Microsoft Azure Cloud.
- Make your Operations better and your Team smarter; **a force multiplier without added labor costs.**

Five (5) Artificial Intelligence Co-Pilots customized for your business to drive information and make recommendations to your team, while your team makes final decisions!

9-HI™ AI Agents

Orion	Scorpius	Cassiopeia	Hercules	Libra
Subject Matter Expert AI Agent	Risk AI Agent	Success Factor AI Agent	Solution AI Agent	Success Evidence AI Agent

No Hallucination concerns. No IP leakage back to public GPT models.
No Risks that cannot be modelled.

9-HI Revolutionizes Your Business Applications and Use Cases

Technology Solution Review — Improve your operations and your product offerings.
Improved Manufacturing or Operations — Analyze and prioritize process improvements for best ROI.
Product/Service Expansion — Add additional revenue streams and enter new markets.
Top and Bottom Line Growth — Evaluate and improve any product or business operation.
Agile utilization of more employees — Identify & leverage unknown employee knowledge for free.
Reduce Supply Chain Issues — Reduce supplier risks / leverage supplier SME teaming.
Improve Development Projects — Accelerate innovation (tech, organizational, and market-based).
Interest Group Collaboration — Collaborate with industry or academic partners.
Investments, M&A, Partnerships — Comprehensive analysis, planning, and reduction of Risks.
Proposal Opportunities — Win more opportunities with comprehensive proposals.
Education & Training — Include less-experienced employees in collaboration.
Improve Customer Relationships — User/customer input for new innovation requirements.
Capture Valuable Company Knowledge — Grow and capture IP and intelligence, stopping brain drain.

The Problem...

Risks kill business growth and technology opportunities. In Technology Development, 90% of all technology investments fail (falling into what is commonly called "The Valley of Death"). Government and Industry waste money, and solutions don't get implemented. People choose the wrong innovation or technology for their application need. In the Supply Chain, buyers fail to understand which suppliers are at risk. Strategies to resolve significant risks are flawed. There is poor awareness of risk types such as adversarial foreign ownership, environmental, social & governance, criminal & regulatory, operational, financial, product shipment, and cybersecurity.

A Multi-user Enterprise Project Platform with holistic AI-based guidance

Selection:
Scoring innovations & technologies that align to needs for Product-Market fit & Problem-Solution fit.

Investment:
Decision Guidance to improve your success & ROI three-fold.

Development:
Manage projects from Concept to Launch, with your Team and AI Guidance working together to meet your objectives, addressing the right risks at the lowest cost.
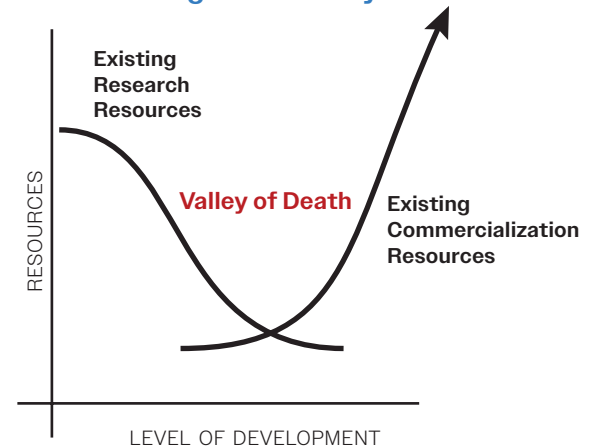

The 9-HI Solution

9-HI uses quantitative, evidenced-based scoring to provide Decision Guidance when it's most needed to keep critical programs and suppliers healthy.
9-HI enables comprehensive Risk Assessment & Mitigation.

Key Benefits:

Intelligent Decision Guidance, Improved Project Success, Lower Risks & Costs, Higher ROI, Rapid AI adoption

9-HI bridges the valley of death

Key Features

Nine (9) core metrics govern all risks and improvement opportunities for: Product Technology, Team & Stakeholders, and Market Application.

Identify Risks: gaps, barriers or vulnerabilities that can derail successful technology selection or development.

Identify Success Factors: used to show accomplishment details when building teams and technology.

Five (5) specially designed AI agents assist with team building, Risk and Success Factor identification, evidence recommendations, and solutioning.

Four (4) Data sources: SME-generated project-centric data, internal 9-HI knowledge database, GPT 3.5 curated query feed from public internet, GPT 3.5 curated query feed from Gov/Enterprise secure databases.
